

ENTERPRISE TASK MANAGEMENT AND SIMPLE PROJECT MANAGEMENT FOR OFFICE 365 AND SHAREPOINT

Delivering top business results while keeping the team effective and motivated are the key commitments for any business leader. Most managers prefer to rely on their leadership skills and personal energy, rather than IT tools. Meanwhile, Microsoft cloud ecosystem can help managers to stay on top of their day and significantly improve business productivity.

Actionspace — Be Effective!

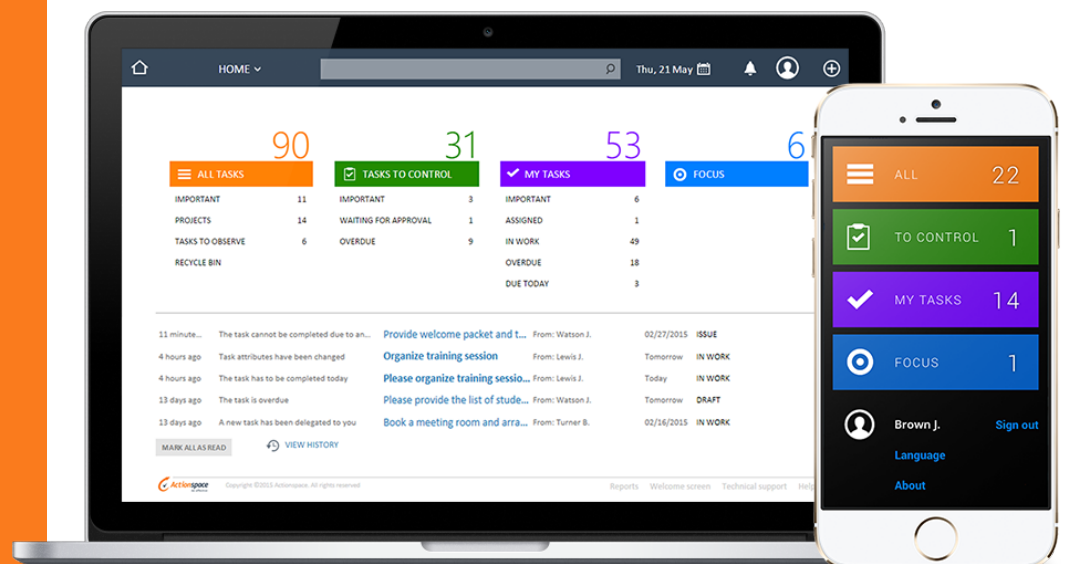

Actionspace, a powerful enterprise task management and simple project management solution designed for Office 365 and SharePoint, provides a unique tool for executives, middle managers and team leaders to manage all business activities within a single application and effectively track progress in projects and tasks, all while anticipating risks.

- Designed with managers' needs in mind, Actionspace brings them ultimate control and transparency, while effectively organizing teamwork in result-oriented work environment.
- The primary focus of Actionspace is enterprise productivity ensured by increased teamwork efficiency (with workflow automation, templates, built-in task approvals, external user support, and other advanced features), as well as improved personal productivity.
- Smart progress tracking instantly highlights potential risks and brings them to manager's attention.
- Robust functionality accompanied by intuitive user interface makes Actionspace a tool of choice for all employees and managers throughout the entire company.
- Inspired by Getting Things Done® and other time management concepts, Actionspace makes employees more effective and helps to deliver projects faster.
- Actionspace Mobile allows everyone in your team to stay on top of their priorities even on the go, between the meetings, or away on business.

Actionspace In Use

Customers in the U.S., Canada, Australia, Europe, Middle East and Latin America use Actionspace throughout the entire organization as well as within teams, e.g. top management team, marketing department, HR team, customer support team, and others.

Wherever it used, Actionspace provides a clear tracking of business task progress, improves visibility, and leverages business productivity.

Leverage Your Office 365 and Azure Ecosystem

We believe that Office 365 is the most promising cloud business solution today. Now more and more companies across the globe are moving to Office 365 and transfer their IT infrastructure into one of the most reliable clouds platforms—Microsoft Azure—in order to streamline teamwork productivity and move their business ahead.

Actionspace was created for all those who need a fully featured task and project management solution for business use, adopted for management needs and seamlessly integrated with corporate Office 365, Azure, or SharePoint infrastructure. Native integration with Microsoft cloud ecosystem provides unrivaled ease of use, seamless access, and quick start:

- ✓ 100% Azure Active Directory synchronization;
- ✓ Secure access with the corporate Microsoft credentials (single sign-on);
- ✓ Confidential access to internal SharePoint content;
- ✓ Instant deployment from Office Store;
- ✓ Highest reliability, availability and security are guaranteed by Microsoft Azure platform.

Being an inherent part of Office 365 ecosystem, Actionspace quickly becomes an essential tool for everyday work for executives, managers and team members.
