

Built on the Powerful Microsoft Azure Platform, ActionSpace Suite Brings Security, Reliability and More Productivity to Business Projects and Tasks

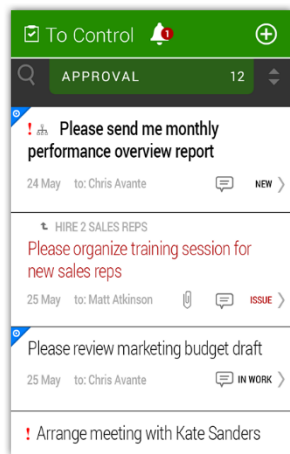

MICROSOFT AZURE APP BUILDER PROFILE: ACTIONSPACE

ActionSpace is a global software vendor helping companies that choose Microsoft Azure as their enterprise platform to improve productivity. Natively integrated with Office 365 and Azure, ActionSpace solutions bring a complete suite of benefits companies need to run their core operations: ultimate workflow visibility, ensured compliance, and unrivaled security.

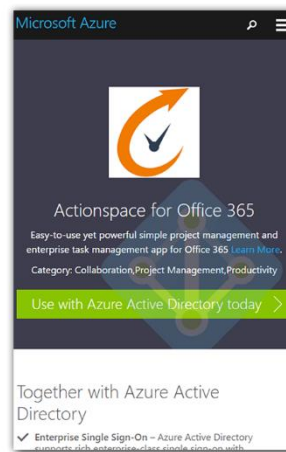

WHAT WE OFFER

Designed with managers' needs in mind, ActionSpace's enterprise task and simple project management add-ins for Office 365 and SharePoint instantly bring ultimate visibility to projects and initiatives, organize teamwork and leverage team members' personal productivity while improving business performance.

Azure Active Directory single sign-on support guarantees seamless access for all users. Together with unrivaled ease of use, it increases business continuity and supports ongoing organizational development via better employee engagement. Lightweight workflow automation helps to complete projects faster.

ActionSpace is backed by Microsoft Azure, one of the most reliable cloud infrastructures, which supports most data compliance standards, including HIPAA. Thanks to SharePoint integration, even companies deeply concerned with the security and confidentiality of their project documents can use ActionSpace.

Native integration with Office 365, Azure and SharePoint makes ActionSpace an inherent part of the enterprise digital workplace. Users can simply add the app from the Office Store or Azure Marketplace and enjoy great opportunities to enhance and leverage the existing Office 365 ecosystem of the company.

WHAT OUR CUSTOMERS ARE SAYING

"ActionSpace is one of the best tools to manage organizational tasks from the ROI perspective. It is a useful tool that helps us to delegate and control tasks in a more efficient way, therefore saving our managers' time." – Zion Menashe, Coop Israel

Microsoft Azure

Microsoft Azure is an open and flexible cloud platform that enables you to quickly build, deploy, scale, and manage applications across a global network of Microsoft data centers. You can build applications using multiple languages, tools, and frameworks.

KEY USE CASES

WEB APPLICATIONS

Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

CLOUD STORAGE

Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

BIG DATA & HPC

Get actionable insights from your data by taking advantage of a fully compatible enterprise-ready Hadoop service.

MOBILE

Accelerate your mobile app development by using a backend hosted on Microsoft Azure. Scale instantly as your install base grows.

MEDIA

Create, manage, and distribute media in the cloud – everything from encoding to content protection to streaming and analytics support.

FLEXIBLE APPLICATION MODEL

Microsoft Azure provides a rich set of application services, including SDKs, caching, messaging, and identity. You can write applications in .NET, PHP, Java, node.js, Python, Ruby, or using open REST protocols. This is all part of Microsoft's promise to let you build using any language, tool, or framework.

ALWAYS ON, ALWAYS HERE

Build resilient applications with automatic operating system and service updating, built-in network load balancing, and geo-redundant storage. Microsoft Azure also proudly delivers a 99.95% monthly SLA. You can rely on decades of experience in data center operations and trust that everything Microsoft Azure offers is backed by industry certifications for security and compliance.

DATA CENTER WITHOUT BOUNDARIES

Microsoft Azure makes it easy for you to integrate your on-premises IT environment with the public cloud. Migrate your virtual machines to Microsoft Azure without the need to convert them to a different format. Use the robust messaging and networking capabilities in Microsoft Azure to deliver hybrid solutions, and then manage your hybrid applications from a single console with Microsoft System Center.

GLOBAL REACH

With data centers around the globe, a massive investment in data center innovation, and a worldwide Content Delivery Network, you can build applications that provide the best experience for users, wherever they are.
